About Me

As a professional in programming and technology, I possess deep expertise in web development and artificial intelligence (AI), with a primary focus on data analysis and digital transformation. My experience in Object-Oriented Programming (OOP) and Algorithms & Programming has strengthened my analytical skills, enabling me to design efficient data-driven solutions and thoroughly understand technological needs.

I specialize in building responsive and functional web applications, integrating various technologies such as JavaScript, Python, and the Bootstrap framework to create optimal user experiences. Additionally, my interest in data analysis and AI drives me to develop machine learning models, including natural language processing (NLP) using Word2Vec for sentiment analysis. I also focus on data processing and information visualization to support strategic decision-making across various sectors.

With experience in digital marketing, I understand the importance of data in designing informed, consumer behavior-based marketing strategies. I am skilled in social media management and digital campaigns, as well as leading data-driven marketing strategies that optimize decision-making.

The combination of my expertise in web development, AI, and business strategy equips me to develop innovative, data-driven solutions. I believe these skills can add value in roles such as Web Developer, AI Specialist, or Data Analyst, while contributing to the creation of impactful digital applications and solutions.

Education

- Formal

Universitas Hasanuddin - Makassar, Indonesia

Information Systems Major, GPA 3.85/4.00

MAN Insan Cendekia Kota Kendari - Kendari/Indonesia
2022

Science Major

- Informal

Codepolitan - Indonesia

Jul 2019 - Mar

2024

- *Bootstrap CSS Framework* [{Link}](#)

Exploring the Bootstrap framework to develop responsive and engaging web layouts. Bootstrap streamlines UI development by providing ready-to-use components, including buttons, forms, grid systems, and other essential elements.

- *Belajar JavaScript* [{Link}](#)

This course covers the core principles of JavaScript—the programming language behind dynamic and interactive web pages. Key topics include variables, functions, objects, event handling, and other critical concepts for building modern web applications.

Cucumber School - Indonesi

2024

- *BDD with Cucumber (JavaScript)* [{LINK}](#)

Studying Behavior-Driven Development (BDD) implementation using Cucumber.js. BDD facilitates collaborative software development through human-readable specifications that bridge communication between developers, QA, and stakeholders. Cucumber executes acceptance tests based on defined application behavior.

Dicoding -Indonesia

2024

- *Belajar Visualisasi Data* [{LINK}](#)

Learn techniques for presenting data visually through charts, graphs, and diagrams to make complex information more understandable. This course helps develop skills in analyzing and presenting data effectively using various visualization tools and techniques..

- *Belajar Fundamental Deep Learning* [{LINK}](#)

Study the core concepts of deep learning, including neural networks, training models, and AI-driven pattern recognition. This course builds foundational knowledge for developing intelligent systems and advanced machine learning applications.

- *Belajar Machine Learning untuk Pemula* [{LINK}](#)

Explore the basics of machine learning, from data preprocessing to model training and evaluation. This course introduces algorithms and practical applications for predictive analytics and data-driven decision-making.

- *Belajar Dasar AI* [{LINK}](#)

Understand the principles of Artificial Intelligence (AI), including problem-solving, automation, and ethical considerations. This course covers AI's real-world applications and foundational technologies..

- *Belajar Dasar Git dengan GitHub* [{LINK}](#)

Master version control fundamentals using Git and GitHub. Learn to manage code repositories, collaborate on projects, and implement best practices for software development workflows..

- *Applied Machine Learning* [{LINK}](#)

Based on the "Applied Machine Learning" certificate from Dicoding, you have gained comprehensive skills in Machine Learning, including the ability to build predictive analytics models for business, perform sentiment analysis using Deep Learning and SVM, implement Computer Vision for image recognition and object detection, and develop recommendation systems using various methods. Additionally, you are proficient in system design and end-to-end Machine Learning project development, all aligned with industry competency standards.

- *Python for Data Science and AI* [{LINK}](#)

The recipient of this badge possesses core skills in Python, including essential data structures, programming fundamentals, and experience with key libraries for data science. They can apply this knowledge to work with data and develop data science applications. This individual also has sufficient Python knowledge to effectively utilize Python libraries.

IBM -Indonesia

2024

- *Introduction to Software Engineering* [{LINK}](#)

Learn the fundamental principles of software engineering, including software development life cycles, design

patterns, and best practices for building scalable and maintainable applications.

- *Generative AI: Introduction and Applications* [{LINK}](#)

Explore the foundations of generative AI, understanding how models like GPT and DALL-E create new content, and discover practical applications across various industries..

- *Generative AI: Prompt Engineering Basics* [{LINK}](#)

Master the art of crafting effective prompts for generative AI models to produce optimal results, learning techniques for precision and creativity in AI interactions..

- *Generative AI Engineering and Fine-Tuning Transformers*[{LINK}](#)

Dive deep into transformer architectures and learn advanced techniques for fine-tuning generative AI models to meet specific use cases and performance requirements..

Alibaba Cloud Akademi-Indonesia

2024

- *Alibaba Cloud Certified Developers* [{LINK}](#) Earn certification as an Alibaba Cloud-trained developer, demonstrating expertise in managing and developing applications on the Alibaba Cloud platform.
- *Public Class - The Large World of Language Models* [{LINK}](#) Explore large language models (like GPT) and their applications across various fields, including their use in natural language processing (NLP)."
- *Dive into Generative AI* [{LINK}](#) Deep dive into Generative AI topics, covering the creation of new content such as text, images, or music using artificial intelligence technologies..
- *Introduction to Application Real-time Monitoring Service* [{LINK}](#) real-time application monitoring concepts using Alibaba Cloud's services to track application performance in real-time.
- *Public Class - Using Generative AI Ethically & Responsibly* [{LINK}](#) Learn about ethics and responsibility in using generative AI, including how to prevent misuse and mitigate negative impacts of this technology.
- *Apsara Clouder: Getting Started with Machine Learning & AI* [{LINK}](#) Learn the fundamentals of Machine Learning and AI using Alibaba Cloud's Apsara platform, including basic techniques for building and training AI models

Work Experience

IT Staff BPK Representative of South Sulawesi – Makassar/Indonesia

March 2025 - Agustus 2025

- Supporting the creation and development of several internal applications for office operational needs
- Assisting with office administration processes related to information technology

Machine Learning Cohort Coding Camp powered by DBS Foundation[{LINK}](#) – Makassar/Indonesia

FEB 2025 - JULY 2025

- Proficient in the fundamentals and implementation of Machine Learning, including algorithms, data preprocessing, model evaluation, and Deep Learning concepts.

- Experienced in processing and analyzing data to build predictive models, and actively participated in a capstone project involving the development of a Machine Learning application using relevant software development methodologies.
- Completed a high-standard training program through a collaboration between DBS Foundation and Dicoding, featuring a practical-oriented curriculum and interaction with industry professionals.

Teacher and Mentor in Ruangguru Coding – Makassar/Indonesia

Just Started

- Supervising and evaluating student presentations for school-level projects
- Guiding and mentoring young students in specific subject areas
- Designing assessment materials for basic computing or logical thinking classes
- Teaching and mentoring children in fundamental programming and problem-solving

Facilitator and Mentor BTPN Syariah – Makassar/Indonesia

February 2025 - Agustus 2025

- Assisting in customer business management
- Mentoring customers in their business endeavors

Assistant Lab Sisfo Unhas – Makassar/Indonesia

June 2023 - December 2025

- Serving as a Judge for New Student Application Presentation Seminars
- Mentoring new students in specific courses
- Creating exam questions for new students in Algorithm and Programming courses
- Teaching and mentoring in the field of Algorithms and Programming
- Teaching and mentoring in the field of Object-Oriented Programming

Freelance AI and Website Developer – Makassar/Indonesia

June 2023 - Present

- Possessing negotiation skills, capable of building relationships and reaching mutually beneficial agreements in various business and project situations.
- Designing and managing a platform connecting users with the latest information on space exploration.
- Implementing sentiment analysis models using Word2Vec to extract insights from text data.
- Building and managing websites for various purposes, including property platforms, local village websites, and attendance automation systems.
- Utilizing technology to enhance efficiency, accuracy, and user experience in various digital applications.

Kompas Siroh – Makassar/Indonesia

May 2023 - Present

- Responsible for managing and administering various social media platforms to increase audience engagement and followers.
- Developing a strategic content calendar to maximize the effectiveness of digital campaigns.
- Designing and creating creative visual content for social media posts, including images, short videos, and infographics using design software.
- Conducting content performance analysis through engagement data to identify trends and improve digital marketing strategies.

- Communicating effectively with the team to ensure alignment between social media strategy and organizational vision.

Virtual Education Academy – Online/Indonesia

August - November 2024

- Designing and implementing digital marketing strategies tailored to the target market and institutional goals.
- Participating in the development of promotional campaigns to increase brand awareness and user acquisition.
- Effectively coordinating marketing team tasks, including task delegation, scheduling, and results reporting.
- Conducting market research and competitor analysis to identify growth opportunities and differentiation.
- Developing marketing materials such as email marketing, digital brochures, and social media content to support promotion.
- Contributing to campaign results evaluation using performance metrics to provide recommendations for future improvements.

Pengalaman Organisasi

Assistant Lab Sisfo Unhas – Makassar/Indonesia

June 2023 - Present

- Served as a Judge for New Student Application Presentation Seminars
- Mentored New Students in specific courses
- Created exam questions for new students in Algorithm and Programming courses
- Taught and mentored in the field of Algorithms and Programming
- Taught and mentored in the field of Object-Oriented Programming

Public Relations of Al-Ikhlas Mosque, Banggai Village – Muna/Indonesia

- Served as a Judge and Committee Member for children's competitions at Al-Ikhlas Mosque, Banggai Village
- Served as a Speaker for Ramadan activities at Al-Ikhlas Mosque, Banggai Village for 4 consecutive years

(MPK) Class Representative Council - Kendari/Indonesia

- Chaired the Plenary Session twice
- Chaired the Student Council President Election Committee twice

Pengalaman Project

- Being a developer and tester of AI-based tools for detecting hate speech on social media and communication platforms.
- Assisting in designing and implementing AI models to identify negative content in the digital space.
- Playing a role in developing technology-based solutions to create a safer online environment.
- Serving as a mentor in the development of hate speech detection systems for various platforms.
- Assisting the team in testing and improving the performance of detection tools to ensure their accuracy and effectiveness.

Spreadsheet Alam AI [\[LINK\]](#) – Makassar/Indonesia

- Developed an interactive spreadsheet application that uses AI to process Excel data, identify headers, and extract rows.
- Implemented data editing features via text and voice commands, creating a more efficient and intuitive user experience

Ai Deteksi Suara Burung [\[LINK\]](#)- Makassar/Indonesia

- Designed and developed a simple AI application that can detect and identify bird species based on their sounds.
- Presented interactive features that display identification results in real-time.
